KNOW THE WEATHER

By E. H. Sims

What is an occluded front? What causes them to form?

An occluded front is almost always formed when a cold front (which travels up to 35 m.p.h. or sometimes even faster) overtakes the slower-moving warm front.

The cold air mass pushes the warm, often moist, air upward and there is a mixing process which may confuse the observer on the ground and even the professional in his forecasting office.

A characteristic of an occluded front is heavy rain and often strong winds. Often, however, the cold front which overtakes the warm will speed up the eastward movement of weather and clearing will come sooner than had the warm front passed overhead in a normal manner.

To give Mrs. M's cheery answer...

you need an
ELECTRIC
FOOD FREEZER

"Why of course! Bring 'em along!" Mrs. Modern can always say that with a smile. It may be her husband asking about bringing a client for dinner . . . or one of the youngsters with pals in tow. But the heat-and-eat treats in Mrs. M's Electric Food Freezer make stretching dinner almost as easy as setting another place or two at table!

Mrs. M's Freezer saves some of Summer, too! Today she's been stocking it with sugar-sweet ears of corn . . . some of them "not to be opened till Christmas" or later. And there'll soon be luscious peaches to freeze for winter treats.

Why don't you be Mrs. M? Drop in soon at your Electric Appliance dealer's. Look over the 1958 Food Freezers. Low, space-saving models that fit under a kitchen work counter. Tall ones with finger-tip doors and roll-out drawers. A color and a size to fit your kitchen . . . your family . . . and your budget!

Health and Beauty

The men in the family may have their hunting equipment and fishing tackle to play with, but you can out-do them any day with your indoor sports collection.

There is your bath pillow, your "curtain caddy," your sponges, brushes, bath trays, terry cloth sarongs, fragrant soaps, and oversized bath towels.

Making yourself prettier, healthier, and more relaxed is about as fine a sport as a woman can go in for and there's so much enticing equipment these days to make a bath a special treatment.

A little bit of a vacation can be enjoyed each day of the year right in your own bathtub.

One of the best beauty investments a woman can make is a bath tray that serves as a vanity table. It rests across the rims of the tub and holds all your little beauty paraphernalia. The ones made of lucite, with a full sized mirror, encourage meticulous grooming.

They also enable you to relax in a tub full of warm water while you give yourself a facial, do your nails, criticize your hair, or most anything else that may come to mind—even eating lunch.

A body brush or sponge, used vigorously, is a sure cure for muddy, roughened skin. There are so many different types of brushes and sponges to choose from that a choice is hard. A very good one is a vinyl plastic back sponge that has broad straps to hold on to when you swish the sponge.

There is a new foot bath on the market that takes only a few minutes. The suds will soften callouses and ease tired arches.

Complicated

A girl and a handsome farm lad were walking along a road together. The farm lad was carrying a large pail on his back, holding a chicken in one hand and a cane in the other, and leading a goat. They came to a dark lane.

Said the girl: "I'm afraid to walk here with you. You might try to kiss me."

Said the farm lad: "How could I, with all those things I'm carrying?"

"Well, you might stick the cane in the ground, tie the goat to it, and put the chicken under the pail."

About The Home

By Frances Dell

A prime requisite of good living is good eating to most of us. A freezer will keep foods fresh for months and will enable you to eat better without the labor of preserving, canning and pickling. What is more, a freezer will save foods that can be preserved in no other way.

With a freezer you are able to buy a year's supply of fruits and vegetables when they are in season and at low prices. Buy frozen foods in case lots at a discount. Leftovers need not be thrown away. Simply wrap and store in the freezer.

When cooking, don't bake just one pie—bake four or five. Make double portions of rolls, cookies, stews. In the long-run, this will cut down your hours of labor in the kitchen. Time can also be saved by cutting down on the shopping necessary.

Almost all foods can be frozen successfully. The list of unfreezable foods will include bottled liquids, and shell eggs, which will expand and break when frozen. Do not freeze avocados, boiled icing, custards, mayonnaise, raw celery, watercress, whole tomatoes, cooked egg whites, creamed fillings for cakes and pies, bananas, milk, sponge cake batter, lettuce, gelatin, and whole watermelons.

Packaging food correctly for freezing must be done with care to insure proper taste texture and preserving qualities of freezing.

Subscription rate: $2.00 a year; payable in advance.
